

ecKnowledge® 9.6 Release Notes

New Functionality:

CASAHL ecKnowledge 9.6 includes several new capabilities to support enterprise data and application integration, extension, migration and synchronization for coexistence across multiple heterogeneous environments:

1. **Support for IBM Lotus Quickr services for WebSphere Portal** – ecKnowledge now supports IBM Lotus Quickr for Portal as a source or target data source in ecKnowledge replication jobs. ecKnowledge 9.6 supports Lotus Quickr for Portal document libraries (including sub-folders).
2. **New XML Content Connector** – This new ecKnowledge connector works with an intermediate XML format which can be used as an ecKnowledge Source data source to import content from virtually any system into collaboration systems such as SharePoint or Lotus Quickr.
3. **Support for security (ACL) migrations** – ecKnowledge now supports the migration of security access control (ACL) information between Lotus Notes, SharePoint, and Lotus Quickr. Users can implement this feature by specifying the appropriate parameter options when defining an ecKnowledge import/export job.
4. **Logical run-time columns** – ecKnowledge now includes logical runtime columns in the Column Mapping screens, for use as temporary “run time” fields when processing data transformations involving Lotus Notes and SharePoint data sources.
5. **Support for MOSS publishing sites and page libraries** – ecKnowledge now supports replication of content into SharePoint publishing sites and page libraries.

Feature Enhancements:

ecKnowledge 9.6 includes the following enhancements to existing features:

1. **Improved Server Manager UI** – ecKnowledge 9.6 has enhanced the Server Manager user interface to include split screens with more statistics visible together in one view, instead of separate tiled views as before. Current server activity is now visible from the highest-level overview.
2. **Log enhancements** – The ecKnowledge Log now provides more statistical detail, which can be viewed more easily in the newly redesigned Server Manager screens.
3. **EDK API enhancements** – The ecKnowledge Developer's Kit has enhanced the API set to provide more comprehensive coverage of ecKnowledge features and functionality.

Bug fixes since ecKnowledge 9.5:

72DEM3	Errors in Attachment replication when converting RichText into an attachment.
7DRPZE	ecKnowledge examples system catalog Errors are addressed.
7FGFS3	Subfolder Level X feature errors are fixed.
7FQULW	Mail Notification Error on Sender field is now fixed.
7GN3J6	Inconsistent Installer behavior for overwriting/leaving files fixed.

(Bug fixes since ecKnowledge 9.5, continued)

7H4383	Server Manager Errors while working with multiple servers fixed.
7FQULW	Mail Notification Error on the Sender.
7GN3J6	Inconsistent Installer behavior for overwriting/leaving files.
7H4383	Server Manager crash.
7HAPYV	Notes Mail Thread to SharePoint Discussion replication creates duplicate responses.
7HHVCG	Notes to SharePoint Discussion 2-way Replication failed to replicate Rich Text.
7HP3FK	Data Corruption when Replicating file attachments to/from Oracle BLOB/CLOB.
7HQQB4	QuickrFolderBrowse appears in import/export for source/target screens.
7KDRX2	Notes DocLib to WSS 2.0 replication failed when WSS connections has login credentials.
7KH5Q8	Composer crash import/export job when target connection is invalid (deleted).

About CASAHL Technology

CASAHL Technology provides software to integrate, extend, or migrate content between Microsoft and IBM Lotus collaborative applications and enterprise systems. Since 1993, more than 1,500 organizations have employed CASAHL solutions to replicate data and applications between Microsoft collaborative applications (such as SharePoint, InfoPath, Groove, and Exchange public folders), IBM Lotus collaborative applications (including Lotus Quickr, Lotus Notes and Domino, QuickPlace and Domino.Doc), and enterprise systems (such as DBMS, ERP, CRM, LOB, and file systems). In addition to our award-winning products, CASAHL ecKnowledge® and Replic-Action™, CASAHL offers training and consulting services for analysis, integration, coexistence and migration projects. CASAHL maintains in-depth knowledge of and expertise in both Microsoft and IBM Lotus technologies and is a member of the Microsoft SharePoint Design Advisory Council (since 2004) and the Lotus Quickr Design Board (since 2007). CASAHL has also licensed its technology under OEM agreements with IBM (1993, 2007), Sybase (2000), Microsoft (2003), and Groove (2005). For more information, visit our website at <http://www.casahl.com>, send e-mail to info@casahl.com, or phone 925-328-2828 (800-324-4284 USA only).

Free Webcast Seminar and Evaluation Software

To learn more about CASAHL products, contact CASAHL and sign up for one of our FREE webcast seminars. CASAHL consultants will customize the presentation to fit your business needs. You can also download a FREE evaluation copy of the software. During the evaluation period, CASAHL representatives are available to assist you with installation, configuration, and familiarization.
